Notice of Commencement of Construction Rehabilitation of Drainage Ditches

The Town of Georgina is undertaking the rehabilitation of drainage ditches on portions of Virginia Boulevard and Burnie Road, as shown below:

Figure 1: Location of Construction Works.

The Town of Georgina has retained Master Utility Division Inc. to carry out construction work to rehabilitate drainage ditches in this area. On-site construction activities are planned to start on April 8, 2024 and are expected to be completed in June 2024.

The work will include excavations to re-establish and re-grade ditches and replacement of some culverts. During the construction work, portions of some roadways will be temporarily blocked-off to accommodate equipment and workers. Please follow traffic directions provided by signs and construction personnel.

Please note that some driveways may need to be closed for brief periods of time while construction is underway. Residents will be notified in advance of the need for temporary driveway closures and will be provided with instructions on where to park vehicles. Driveways and lawn areas that are disturbed by the construction work will be restored to pre-construction conditions.

The Town of Georgina appreciates the patience and cooperation of residents in accommodating this temporary disturbance while we work to improve the Town's infrastructure.

For more information about this project please contact the undersigned.
