Notice to residents

Pre-construction Field Investigations

Dear resident/occupant,

The Town of Georgina is undertaking the design and construction of the replacement of a watermain in your area. The project will replace existing watermain infrastructure that has reached the end of its useful life span and has been a maintenance issue for the Town. The project limits extend along Golfview Crescent from Wood River Bend to the east limit, labelled in the figure below.

The Town has retained EXP Services Inc. as its engineering consultant to prepare the design of the new watermain. Design work is ongoing and it is expected that construction will begin in the summer of 2025.

Starting the week of Feb. 17, 2025, EXP's team will be conducting field investigations in the project area. These investigations will include surveying and soil drilling/sampling. During this time, there may be temporary disruptions to a single lane on Golfview Crescent while inspections are conducted. Two-way traffic and pedestrian traffic will be maintained for the entire duration of any lane closures.

Thank you for your patience as we complete this important project. Should you have any questions or require further information, contact us or visit georgina.ca/QueenswayWatermain.
